

DHEA Liposomal Drops

Liposomal Delivery System

DESCRIPTION

DHEA Liposomal Drops is a soy-free, easy-to-use supplement to help maintain normal levels of DHEA.

FUNCTIONS

DHEA serves as an important adrenal hormone that supports healthy aging. Produced from cholesterol by the adrenal glands, DHEA is present at high levels in brain tissue. DHEA also serves as a precursor to the sex hormones estrogen and testosterone. With age, DHEA production declines, usually peaking between the ages of 25-30 and gradually falling to a decline of 90% by age 60.

DHEA seems to support insulin growth factor (IGF-1) levels. IGF-1 is the hormone or growth stimulating metabolite produced by the metabolism of HGH and is responsible for the beneficial effects of elevated human growth hormone. Cortisol is a stress hormone. With aging, there is a decline in DHEA and an elevation of cortisol. High and prolonged levels of cortisol, like those associated with chronic stress, have been shown to have negative effects, such as impaired cognitive performance, suppressed thyroid function, blood sugar imbalances, decreased bone density, a decrease in muscle tissue, higher blood pressure and lowered immunity. Besides stress, other factors that contribute to low DHEA levels include aging, sugar, nicotine, caffeine, alcohol and a vegetarian diet low in cholesterol and healthy fats.

Studies have suggested that supplementing with DHEA may benefit immune function, blood sugar metabolism, weight management, brain and bone health, heart health, and estrogen and testosterone levels.

INDICATIONS

DHEA Liposomal Drops may be a useful adjunct for individuals who wish to support the body's normal DHEA function.

FORMULA (WW #10398)

0.25 mL Contains:

DHEA (dehydroepiandrosterone) 6.25 mg
Stevia leaf extract..... 0.5 mg

Other Ingredients: Glycerin, sunflower oil, ethyl alcohol, oleic acid polyglyceride, sunflower lecithin, natural grape flavor, xanthan gum, water, citric acid. Vegetarian and gluten-free.

SUGGESTED USE

As a dietary supplement, adults (18 years and over) use 0.25 mL by mouth, or as directed by a healthcare practitioner.

SIDE EFFECTS

Warning: Not for use by individuals under the age of 18. Do not use if pregnant or nursing. Consult a physician or healthcare professional before using this product if you have, or have a family history of, prostate cancer, prostate enlargement, heart disease, low HDL, or if using other dietary supplements, prescriptions drugs, or over-the-counter drugs. Do not exceed recommended serving. Exceeding serving may cause side effects such as acne, hair loss, facial hair growth, aggressiveness, irritability and increased levels of estrogen. Discontinue use and contact a physician or healthcare professional if rapid heartbeat, dizziness, blurred vision or other similar symptoms occur. May interfere with birth control medications and devices.

STORAGE

Store in a cool, dry place, away from direct light. Keep out of reach of children.
